### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The claims have been allowed because none of the references of record teach or suggest the claimed use of aqueous solutions or slurries of alkylene glycol polymer or alkylene glycol copolymer to remove ruthenium out of a gas, or the cartridge containing a substrate in which alkylene glycol polymer or alkylene glycol copolymer is placed. JP 4-83,199 A (one of the more pertinent references of record) discloses the use of polyethylene filled body to remove ruthenium out of a gas, but JP 4-83,199 A does not teach or suggest the use of alkylene **glycol** polymer or copolymer to remove the ruthenium out of the gas. The abstract of WO 01/07147 A1 describes the use of polyethylene glycol to remove hydrogen sulfide and carbon dioxide out of a gas, but not ruthenium out of a gas.

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
